

Assurance and Advisory Graduate Job Description

What qualification will you need?

- Commerce (or commerce/law conjoint) degree with accounting major
- Commerce degree with an IT or data management major

What skills do you need?

- A team player
- Exceptional communication and interpersonal skills
- Driven by delivery and high performance
- Sharp and analytical
- Flexible and resilient
- Fun and able to enjoy success

What kind of clients will I work with?

- Large NZ Businesses such as Air New Zealand, Meridian Energy and Ryman Healthcare
- Start-ups including recent Fast 50 winners such as My Food Bag
- Multinational Consumer and Aviation organisations
- Hospitality clients nationwide
- Infrastructure companies such as ports and energy distribution
- Not-for profit such as St John and NZ Red Cross

Did you know?

- Analysts often get involved with end of year stock takes – feel like counting burger patties??
- In your first few years you will spend at least 80% of your time on client site
- You will form part of multiple project teams
- Assurance is one of our most diverse teams
- Training and staff opportunities mean national travel expectations
- In recent years, we have sent staff on secondment to Luxembourg, UK, Ireland, Australia, Canada, USA & Switzerland
- Within 12 months of starting you can be given the opportunity to coach interns

What will you be doing?

- Understand and document client operations & their business processes
- Testing business control effectiveness, design and implementation
- Assist in planning audit files and planning audit programme
- Apply Deloitte's audit methodology during the audit – testing of balance sheet items
- Identifying opportunities to apply analytics and improve efficiency of audit in any way
- Presenting audit finding back to audit manager/partner
- Developing recommendation to clients on best practices and ensuring that their financial statements are in line with audit standards
- Perform procedures to obtain audit evidence about amounts and disclosures in the financial statements
- Work with other specialists such as Tax, Treasury and valuation as client needs demand

What about technology?

- Technology increasingly plays a key role within audit
- We incorporate innovative technologies to deliver valuable insights to clients about their business
- Data analytics, visualisation techniques, and artificial intelligence are dramatically changing the way Deloitte is able to approach and conduct audits
- Basic data skills in particular Excel and now a big advantage

Where can I work?

What impact will you make?
